

The first private  
cloud in the word!

In this manual, we will explain step-by-step how to install and set up your cloud. In other words, "storage cloud".

1

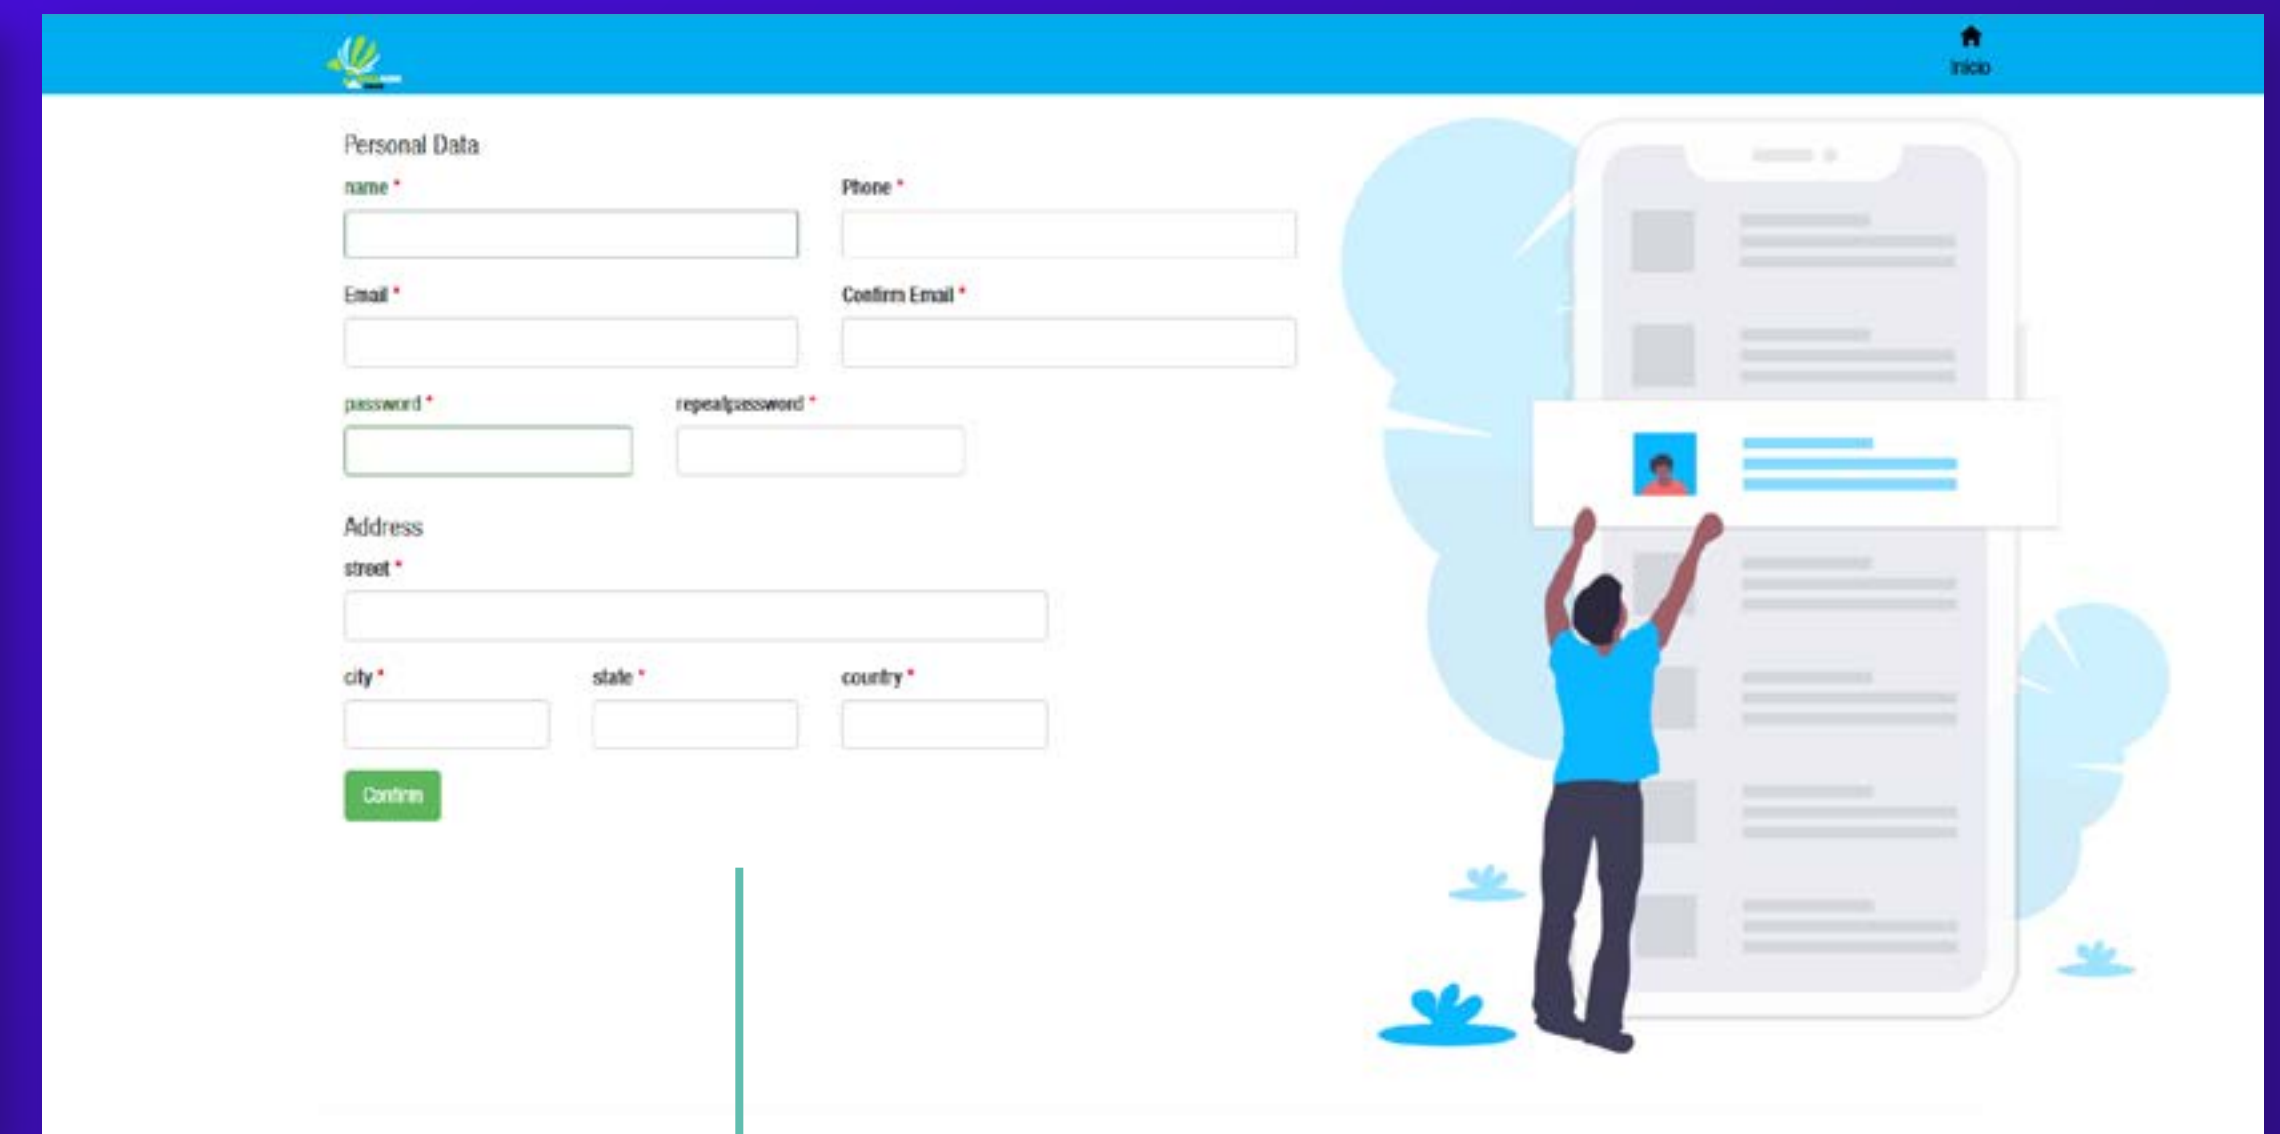

Access the Balloon Driver's site, the first step is to sign up.

[www.balloondrive.com](http://www.balloondrive.com)

2

Fill the form with your data.

*You can trust us because our site is completely safe and your information will be protected.*

3

Now, let's go to define a plan of your preference.

Silver	GOLD	PLATINUM	DIAMOND
R\$ 0,00	R\$ 5,00	R\$ 10,00	R\$ 20,00
✓ 2 devices	✓ 32 devices	✓ 64 devices	✓ 128 devices
Select	Select	Select	Select

Silver

You the right to use in 2 devices. Moreover, it is free!

GOLD

You can use it on 32 devices.

PLATINUM

For big companies, you can use it on 64 devices.

DIAMOND

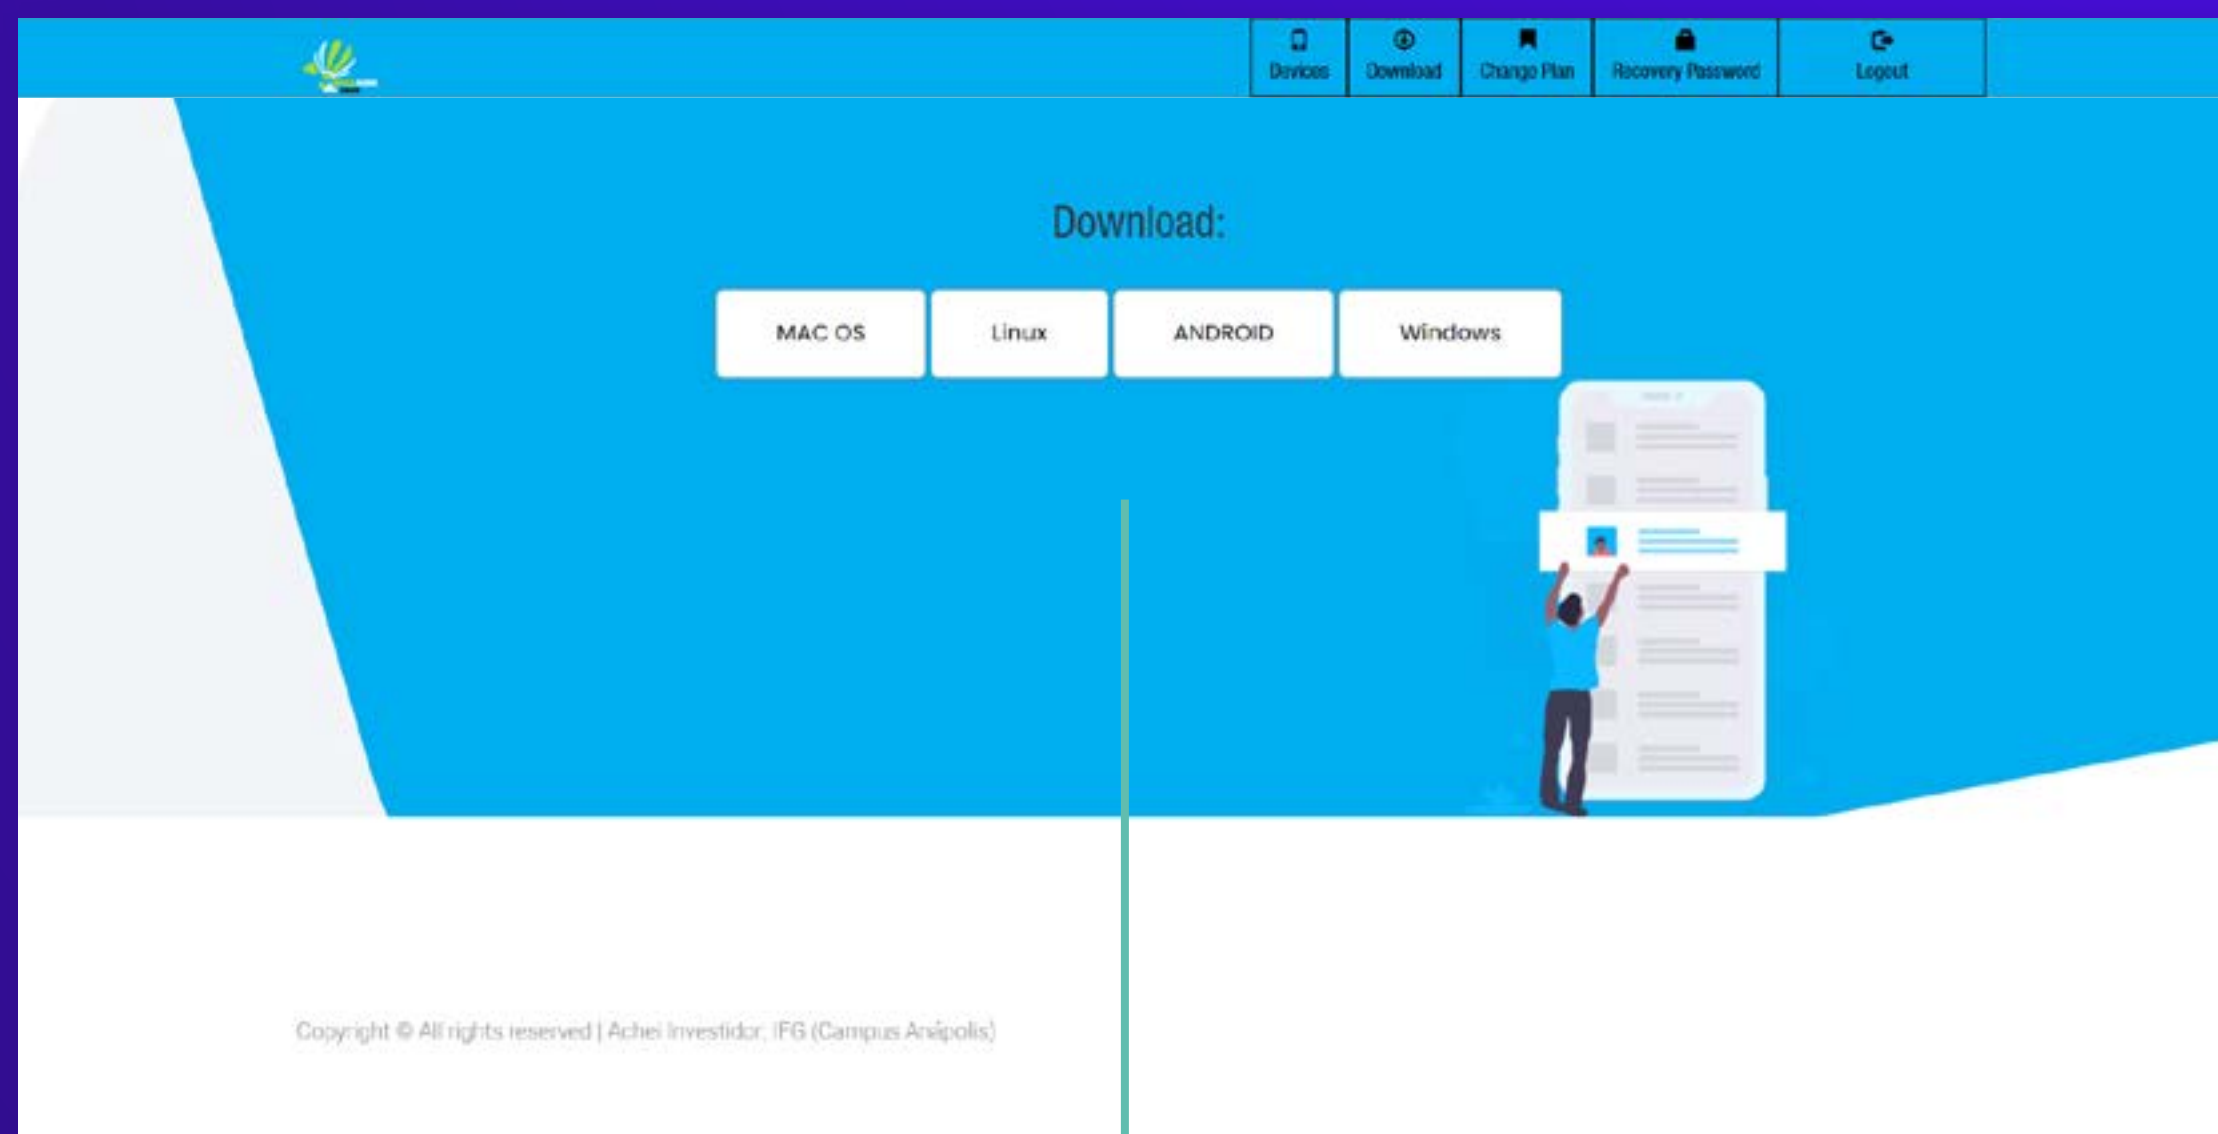

You the right to use it on 128 devices.

*Remember that is necessary to have at least 2 devices to mount your particular cloud*

4

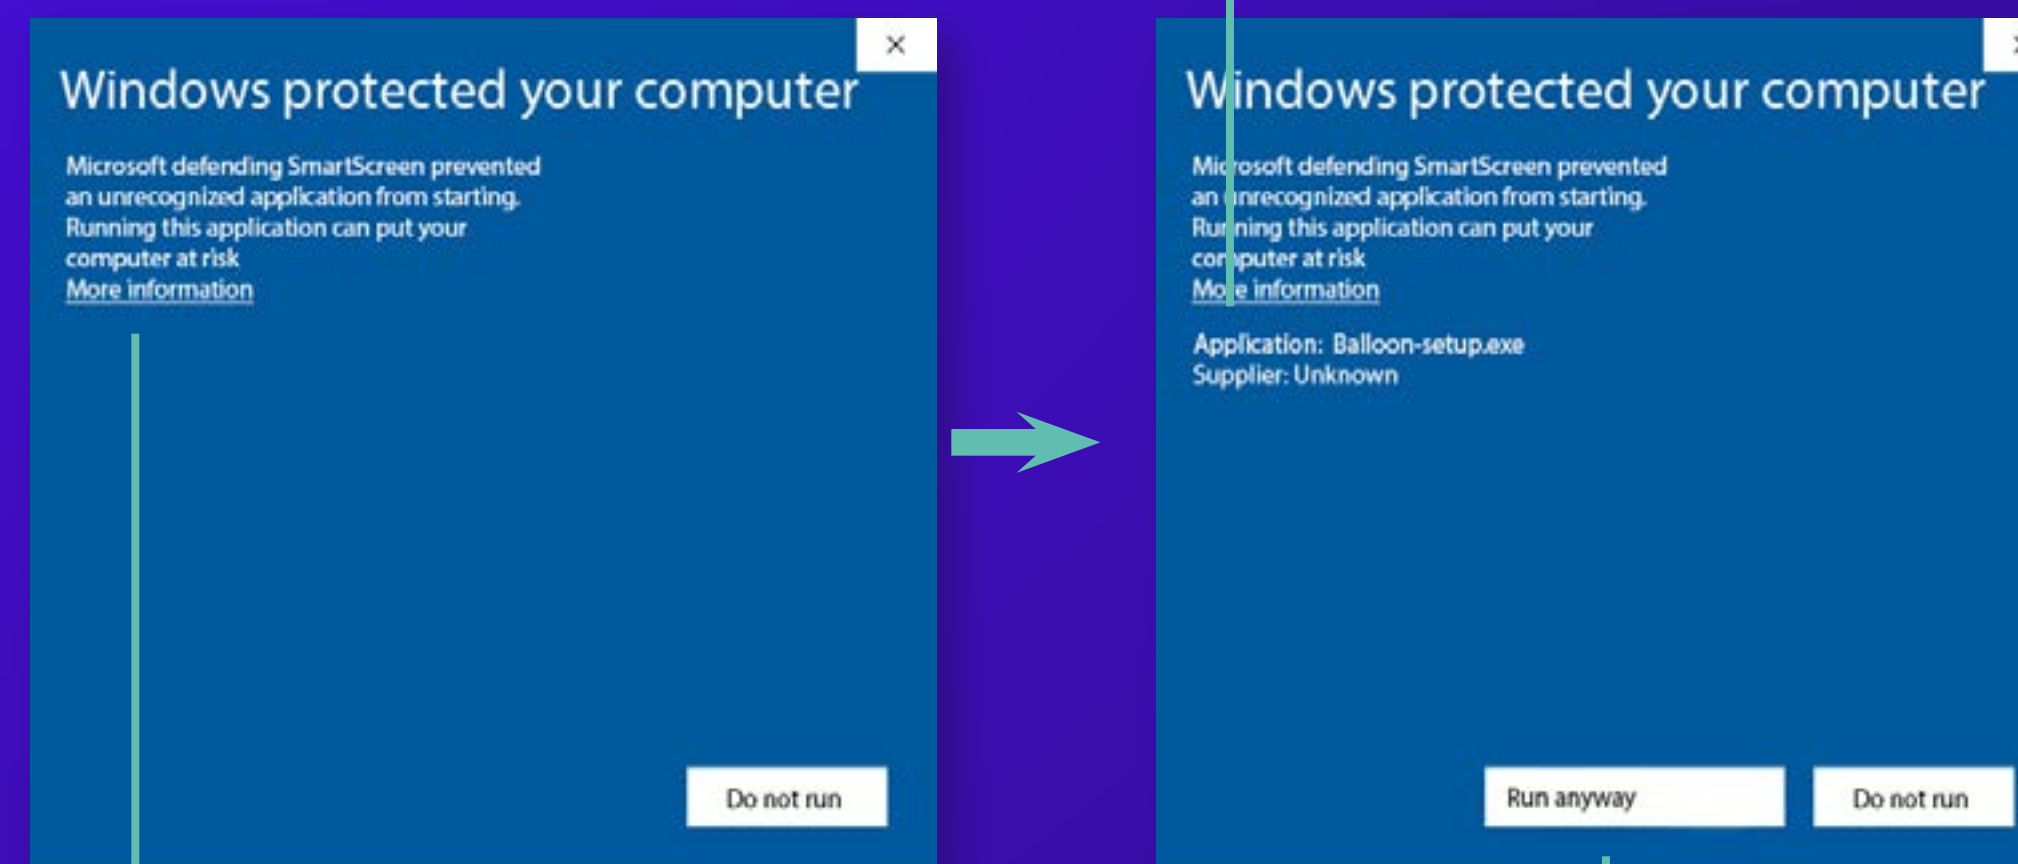

Defined the plan. Just press confirm your choice and let's go to the download.

Select your operating system.

B

confirm that you are executing our installation application

A

Click for more information,

C

and click on Run anyway.

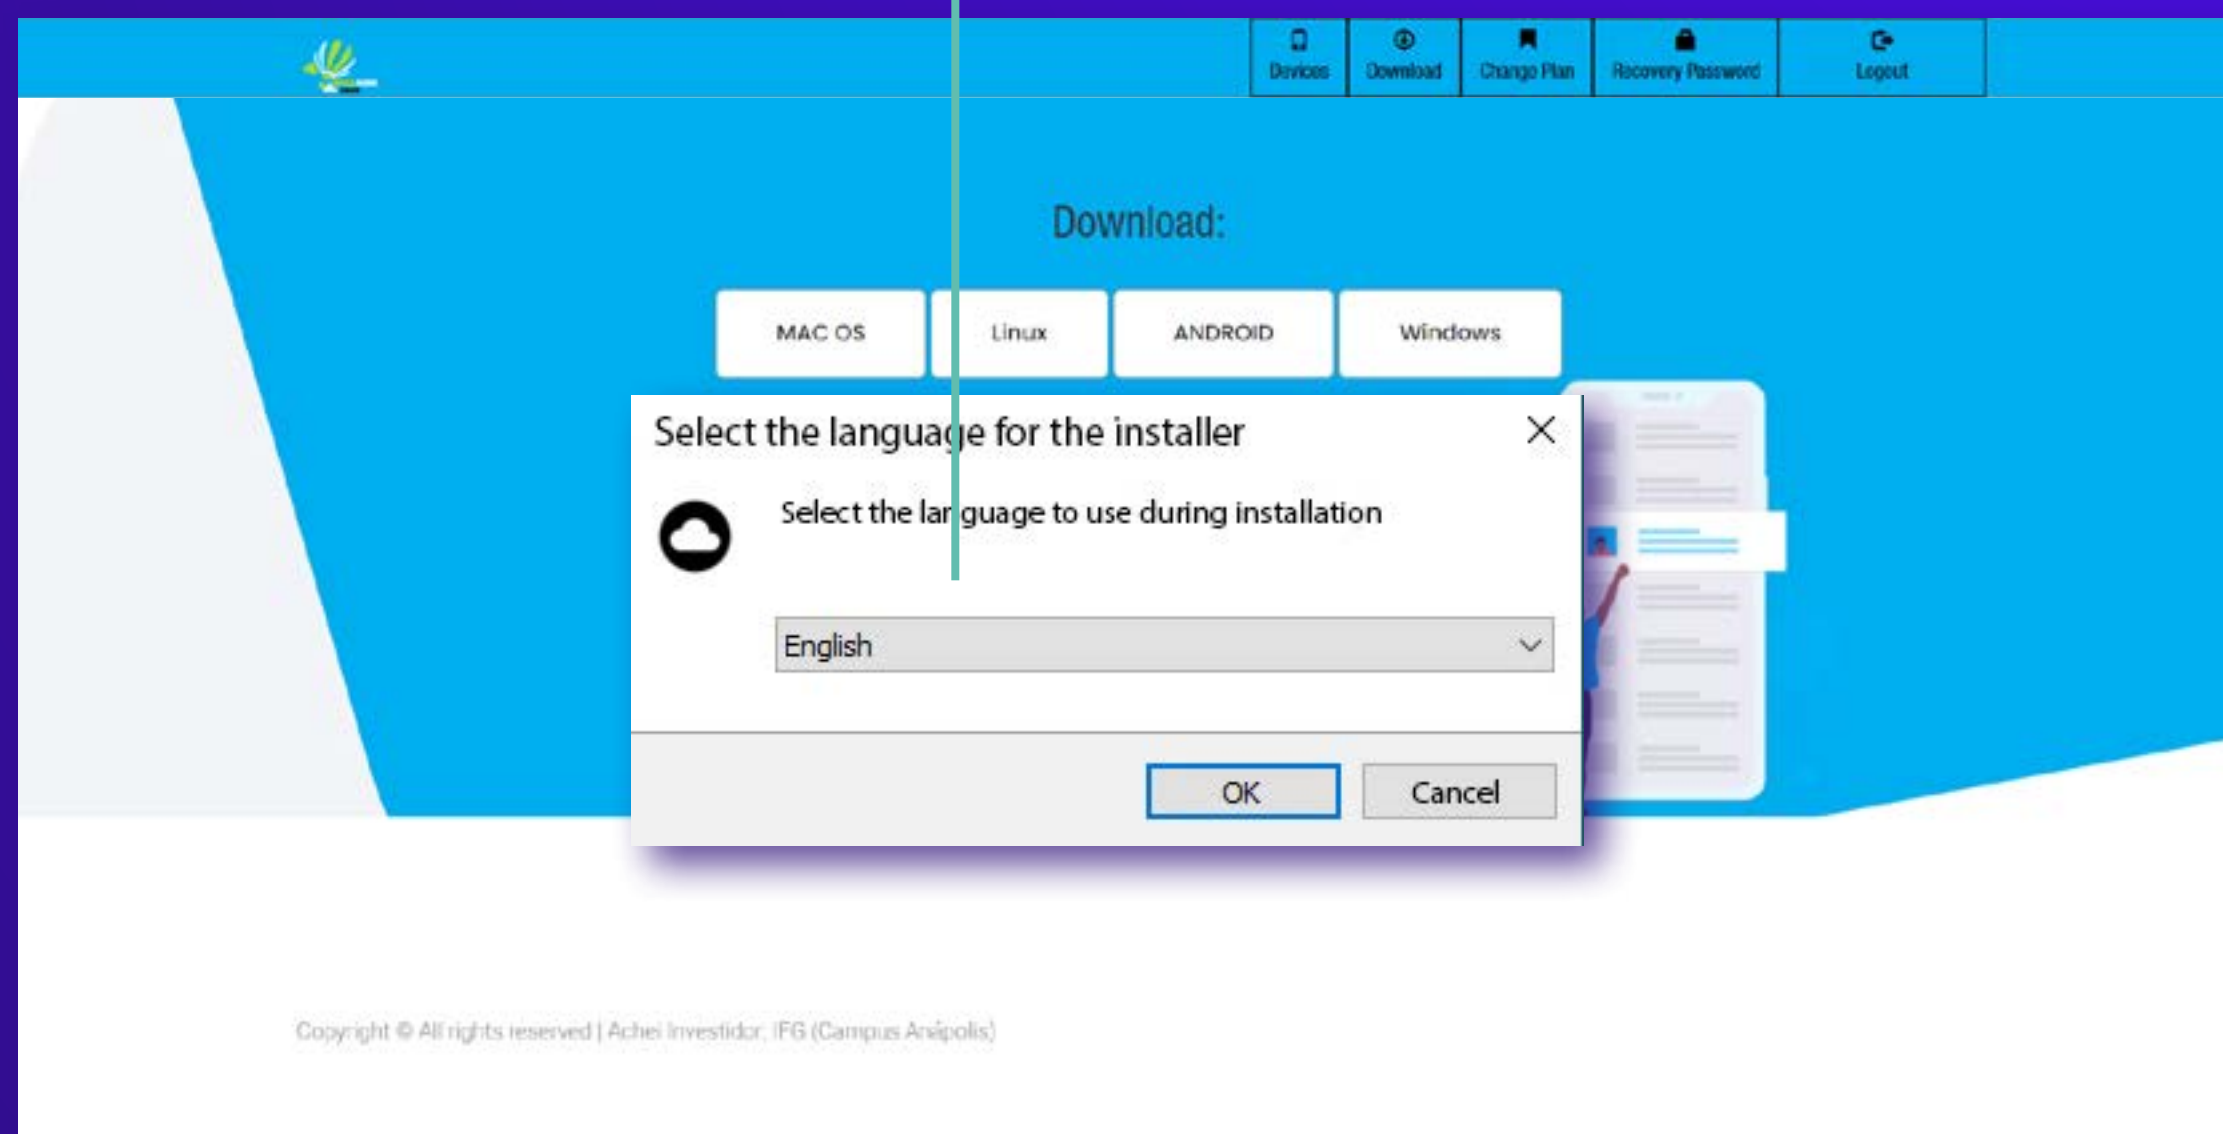

5

Appeared an operating system's message? Don't worry because it normal!

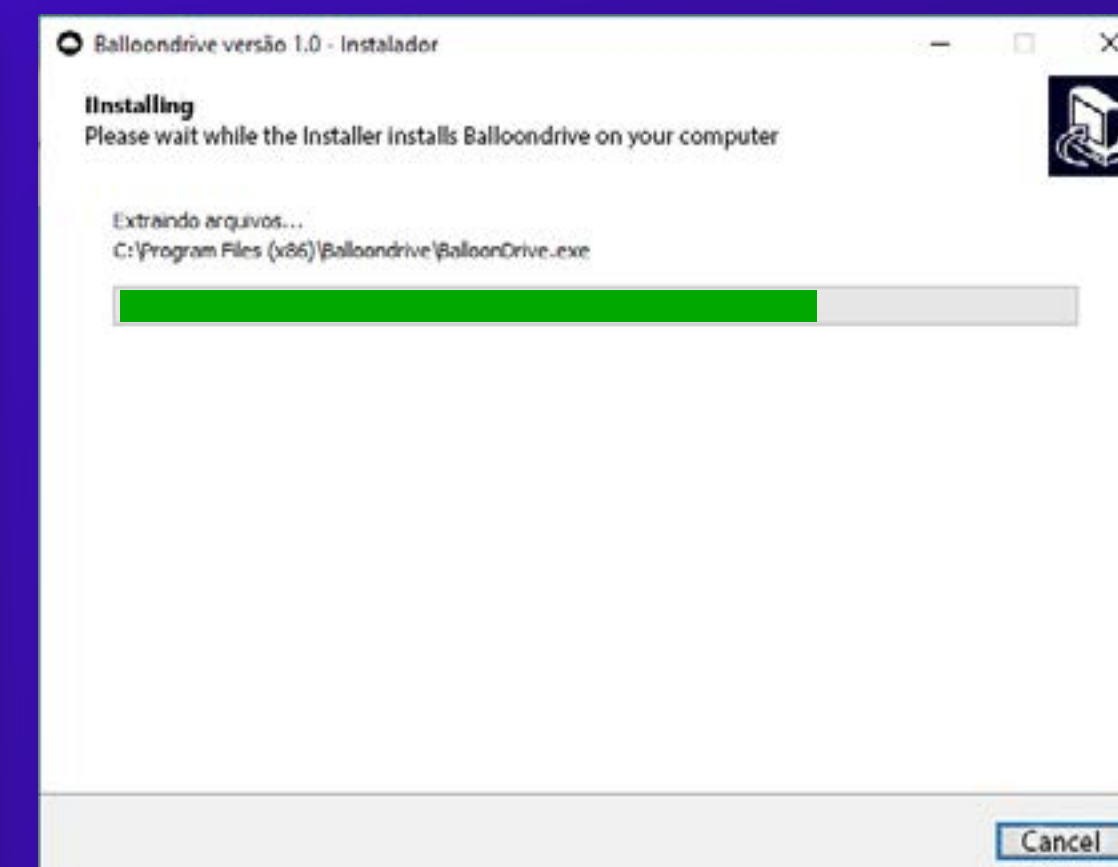

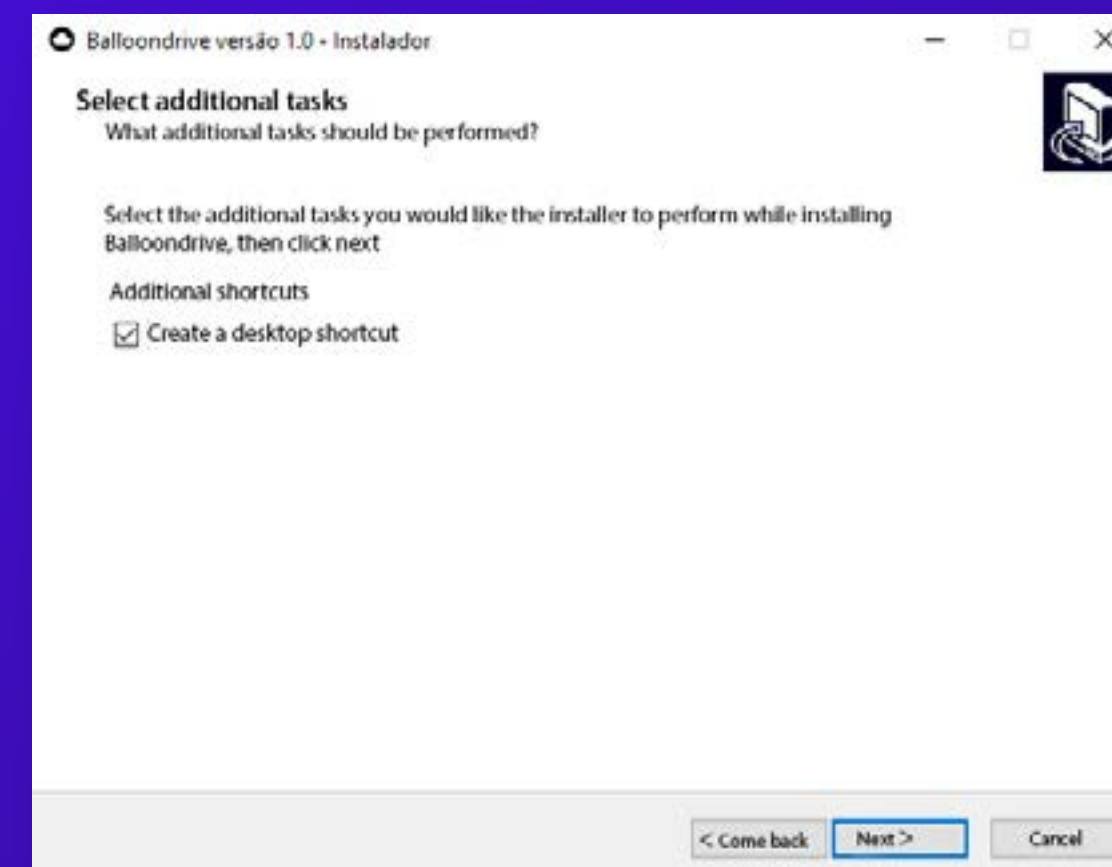

6

Select a language.

*This process spend some minutes.*

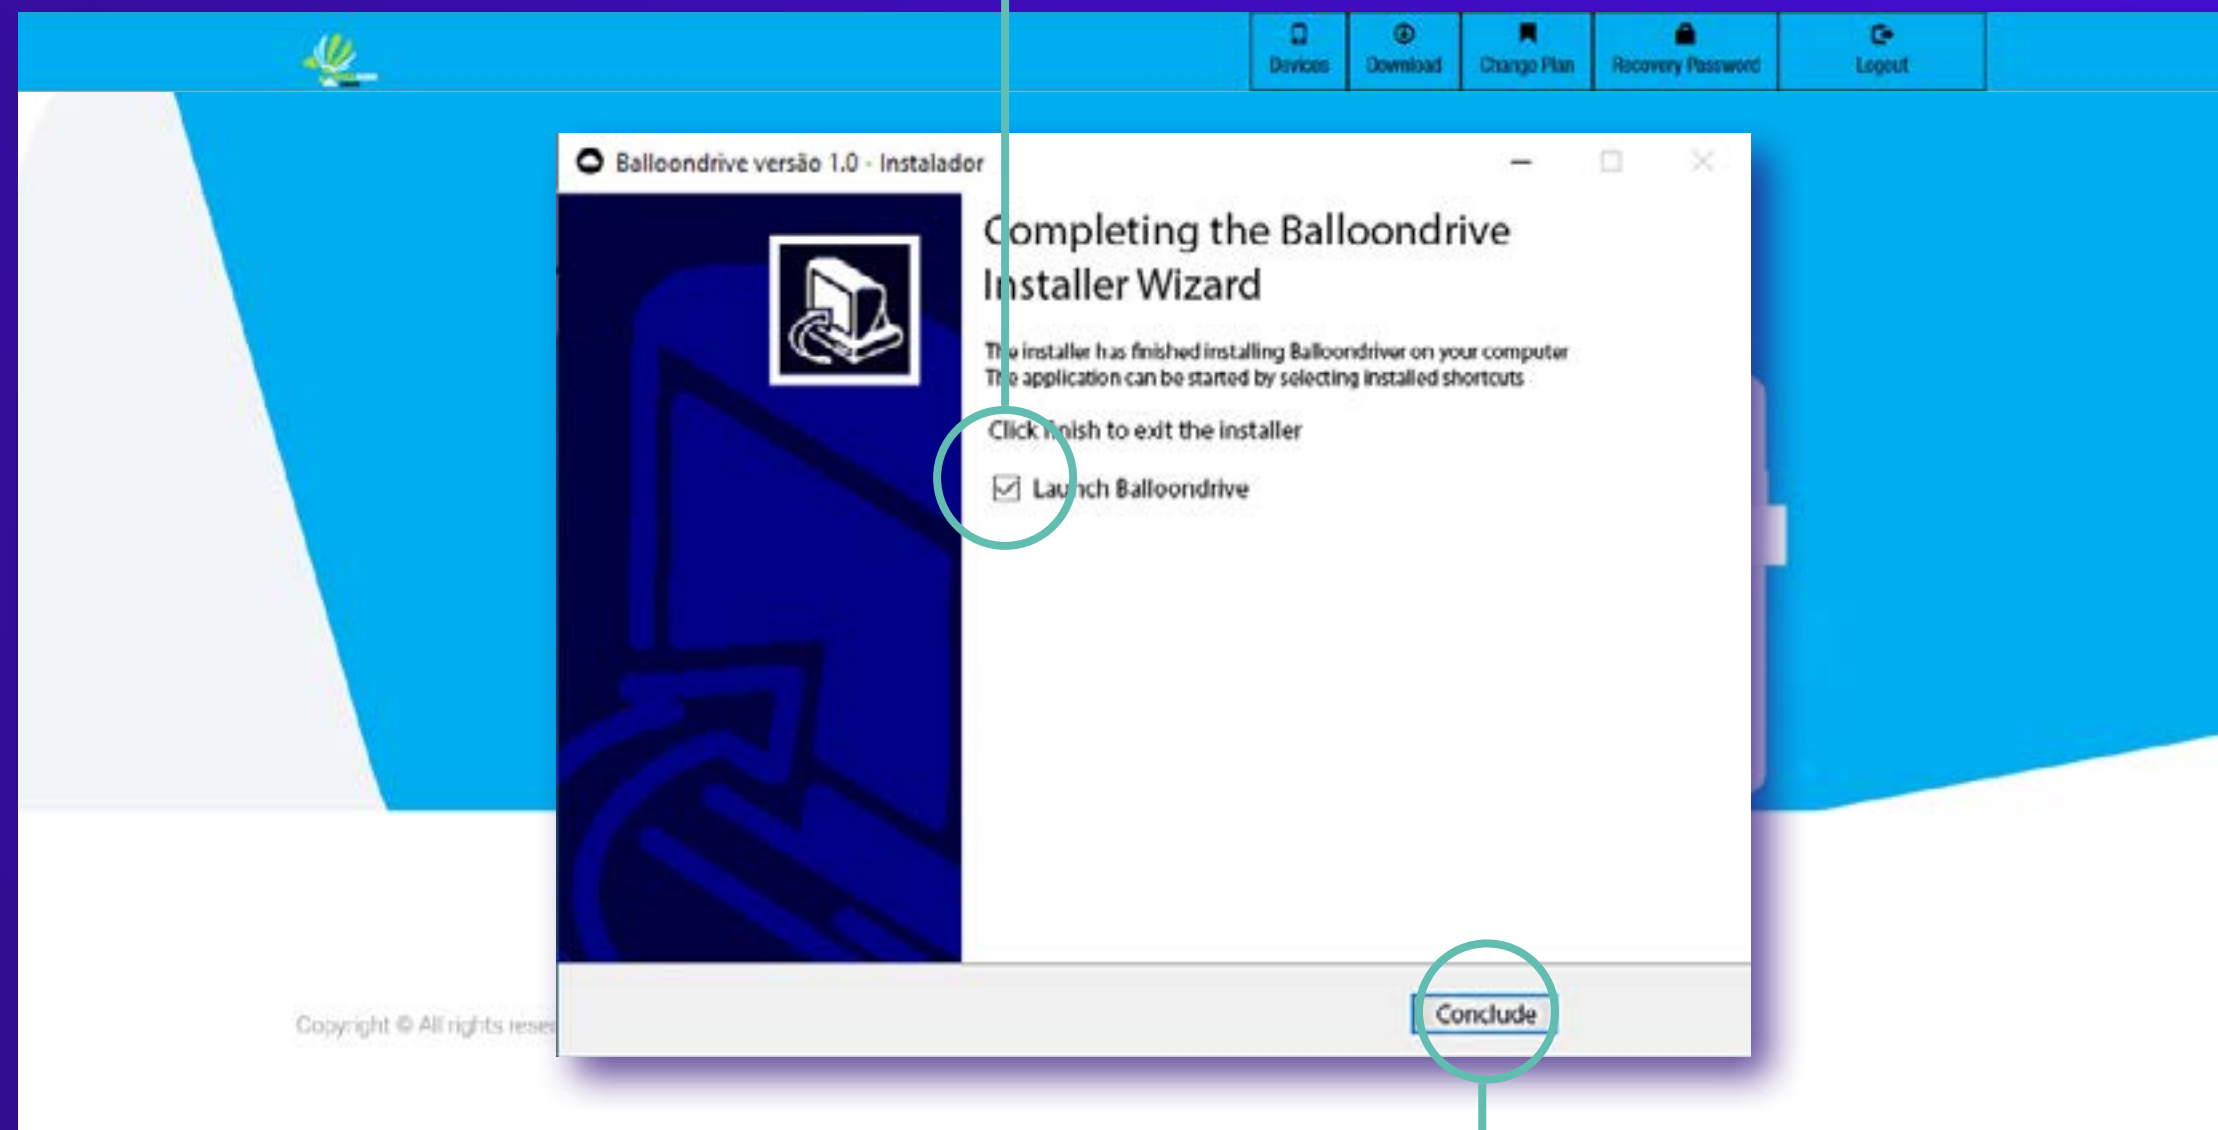

7

And now install the Ballon drive.

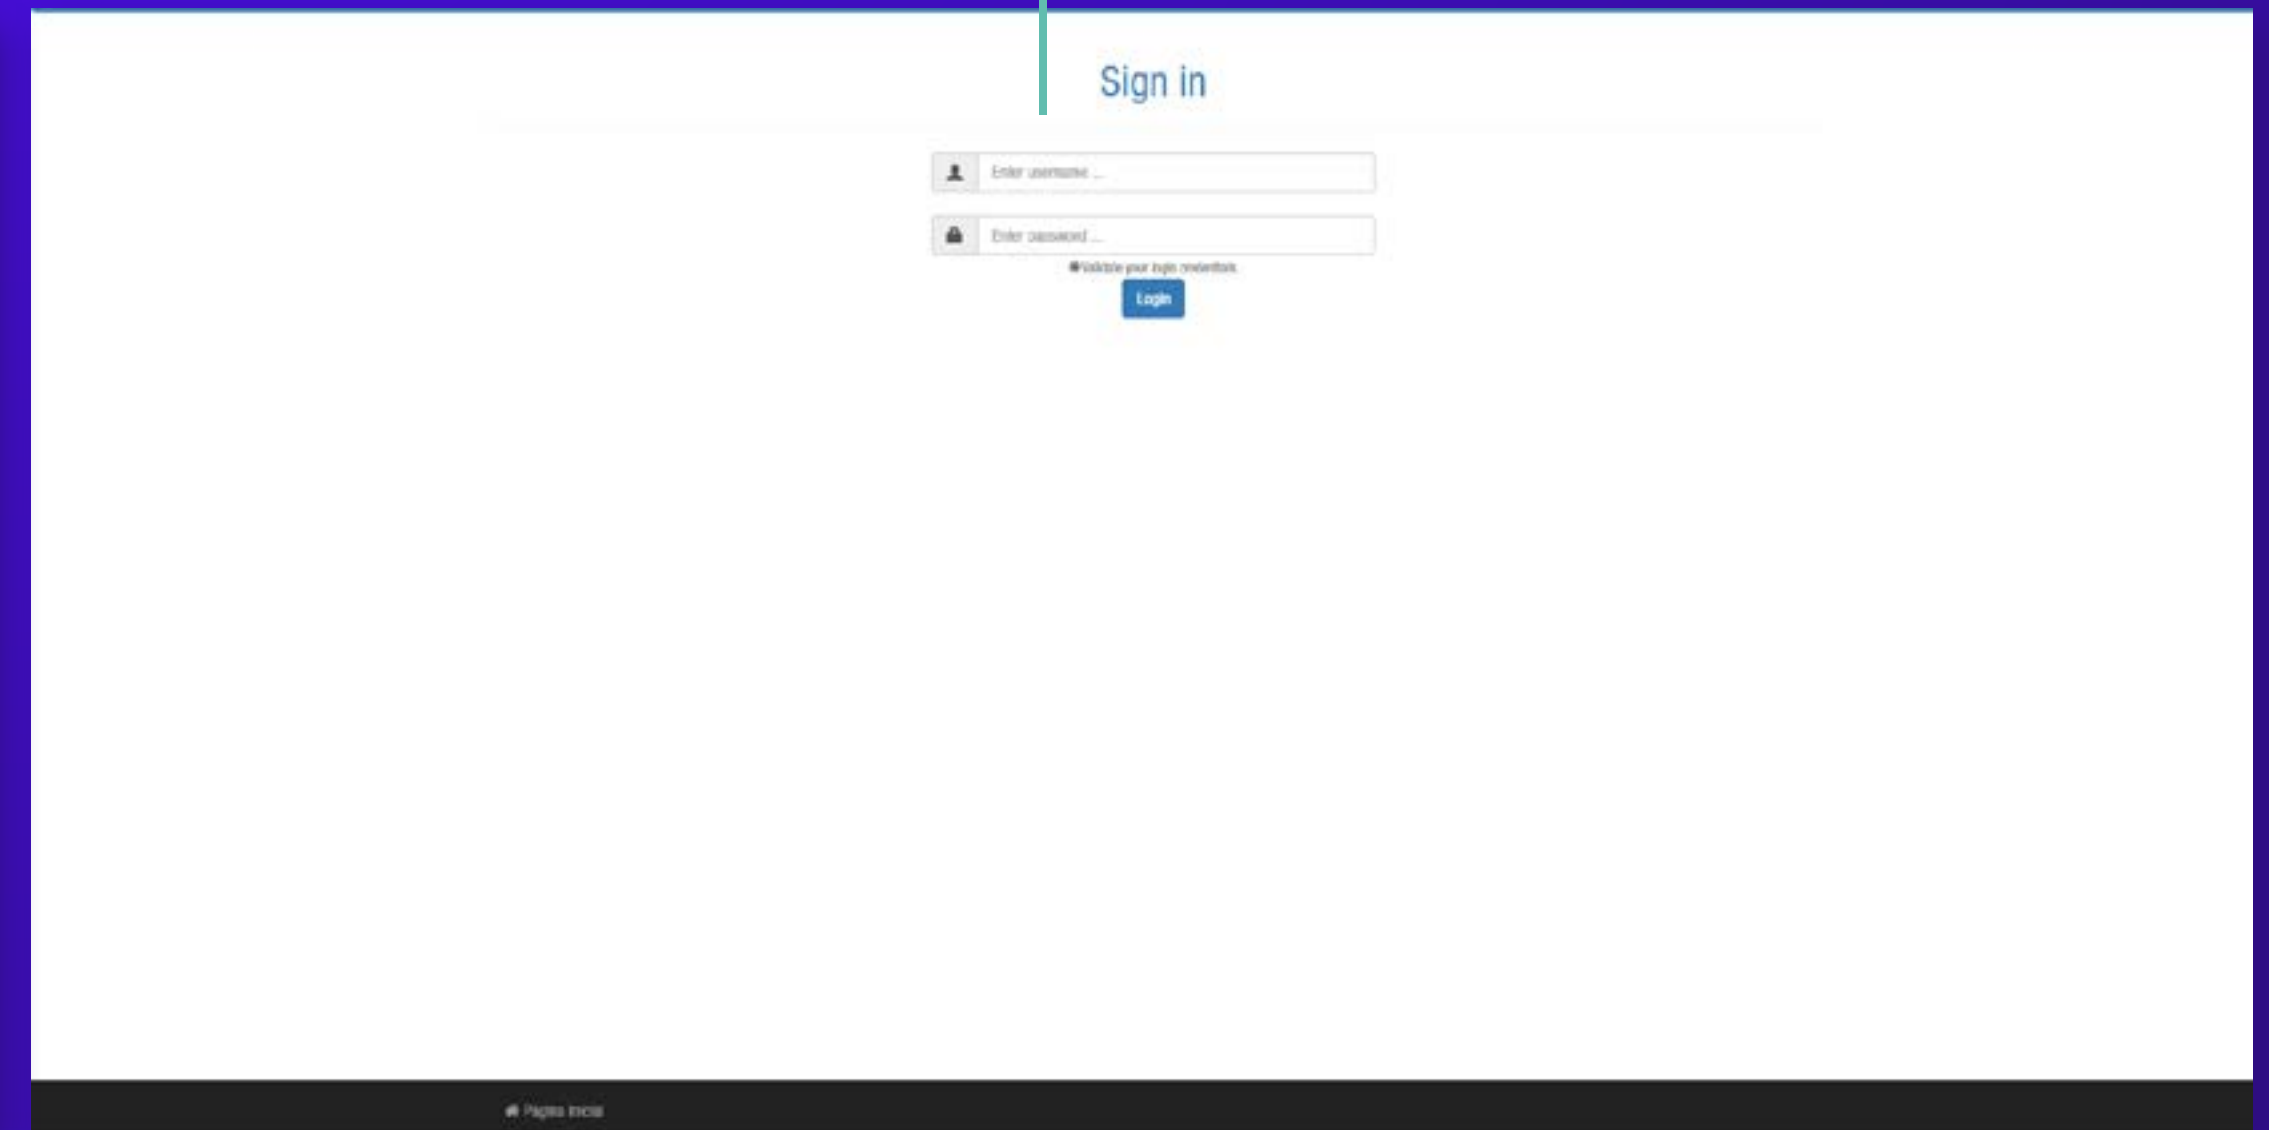

8

Installed the Balloondriver, verify if the option "start the Ballon drive is selected".

And click in finished.

Insert a password and an e-mail address registered and wait for Ballon drive to restart.

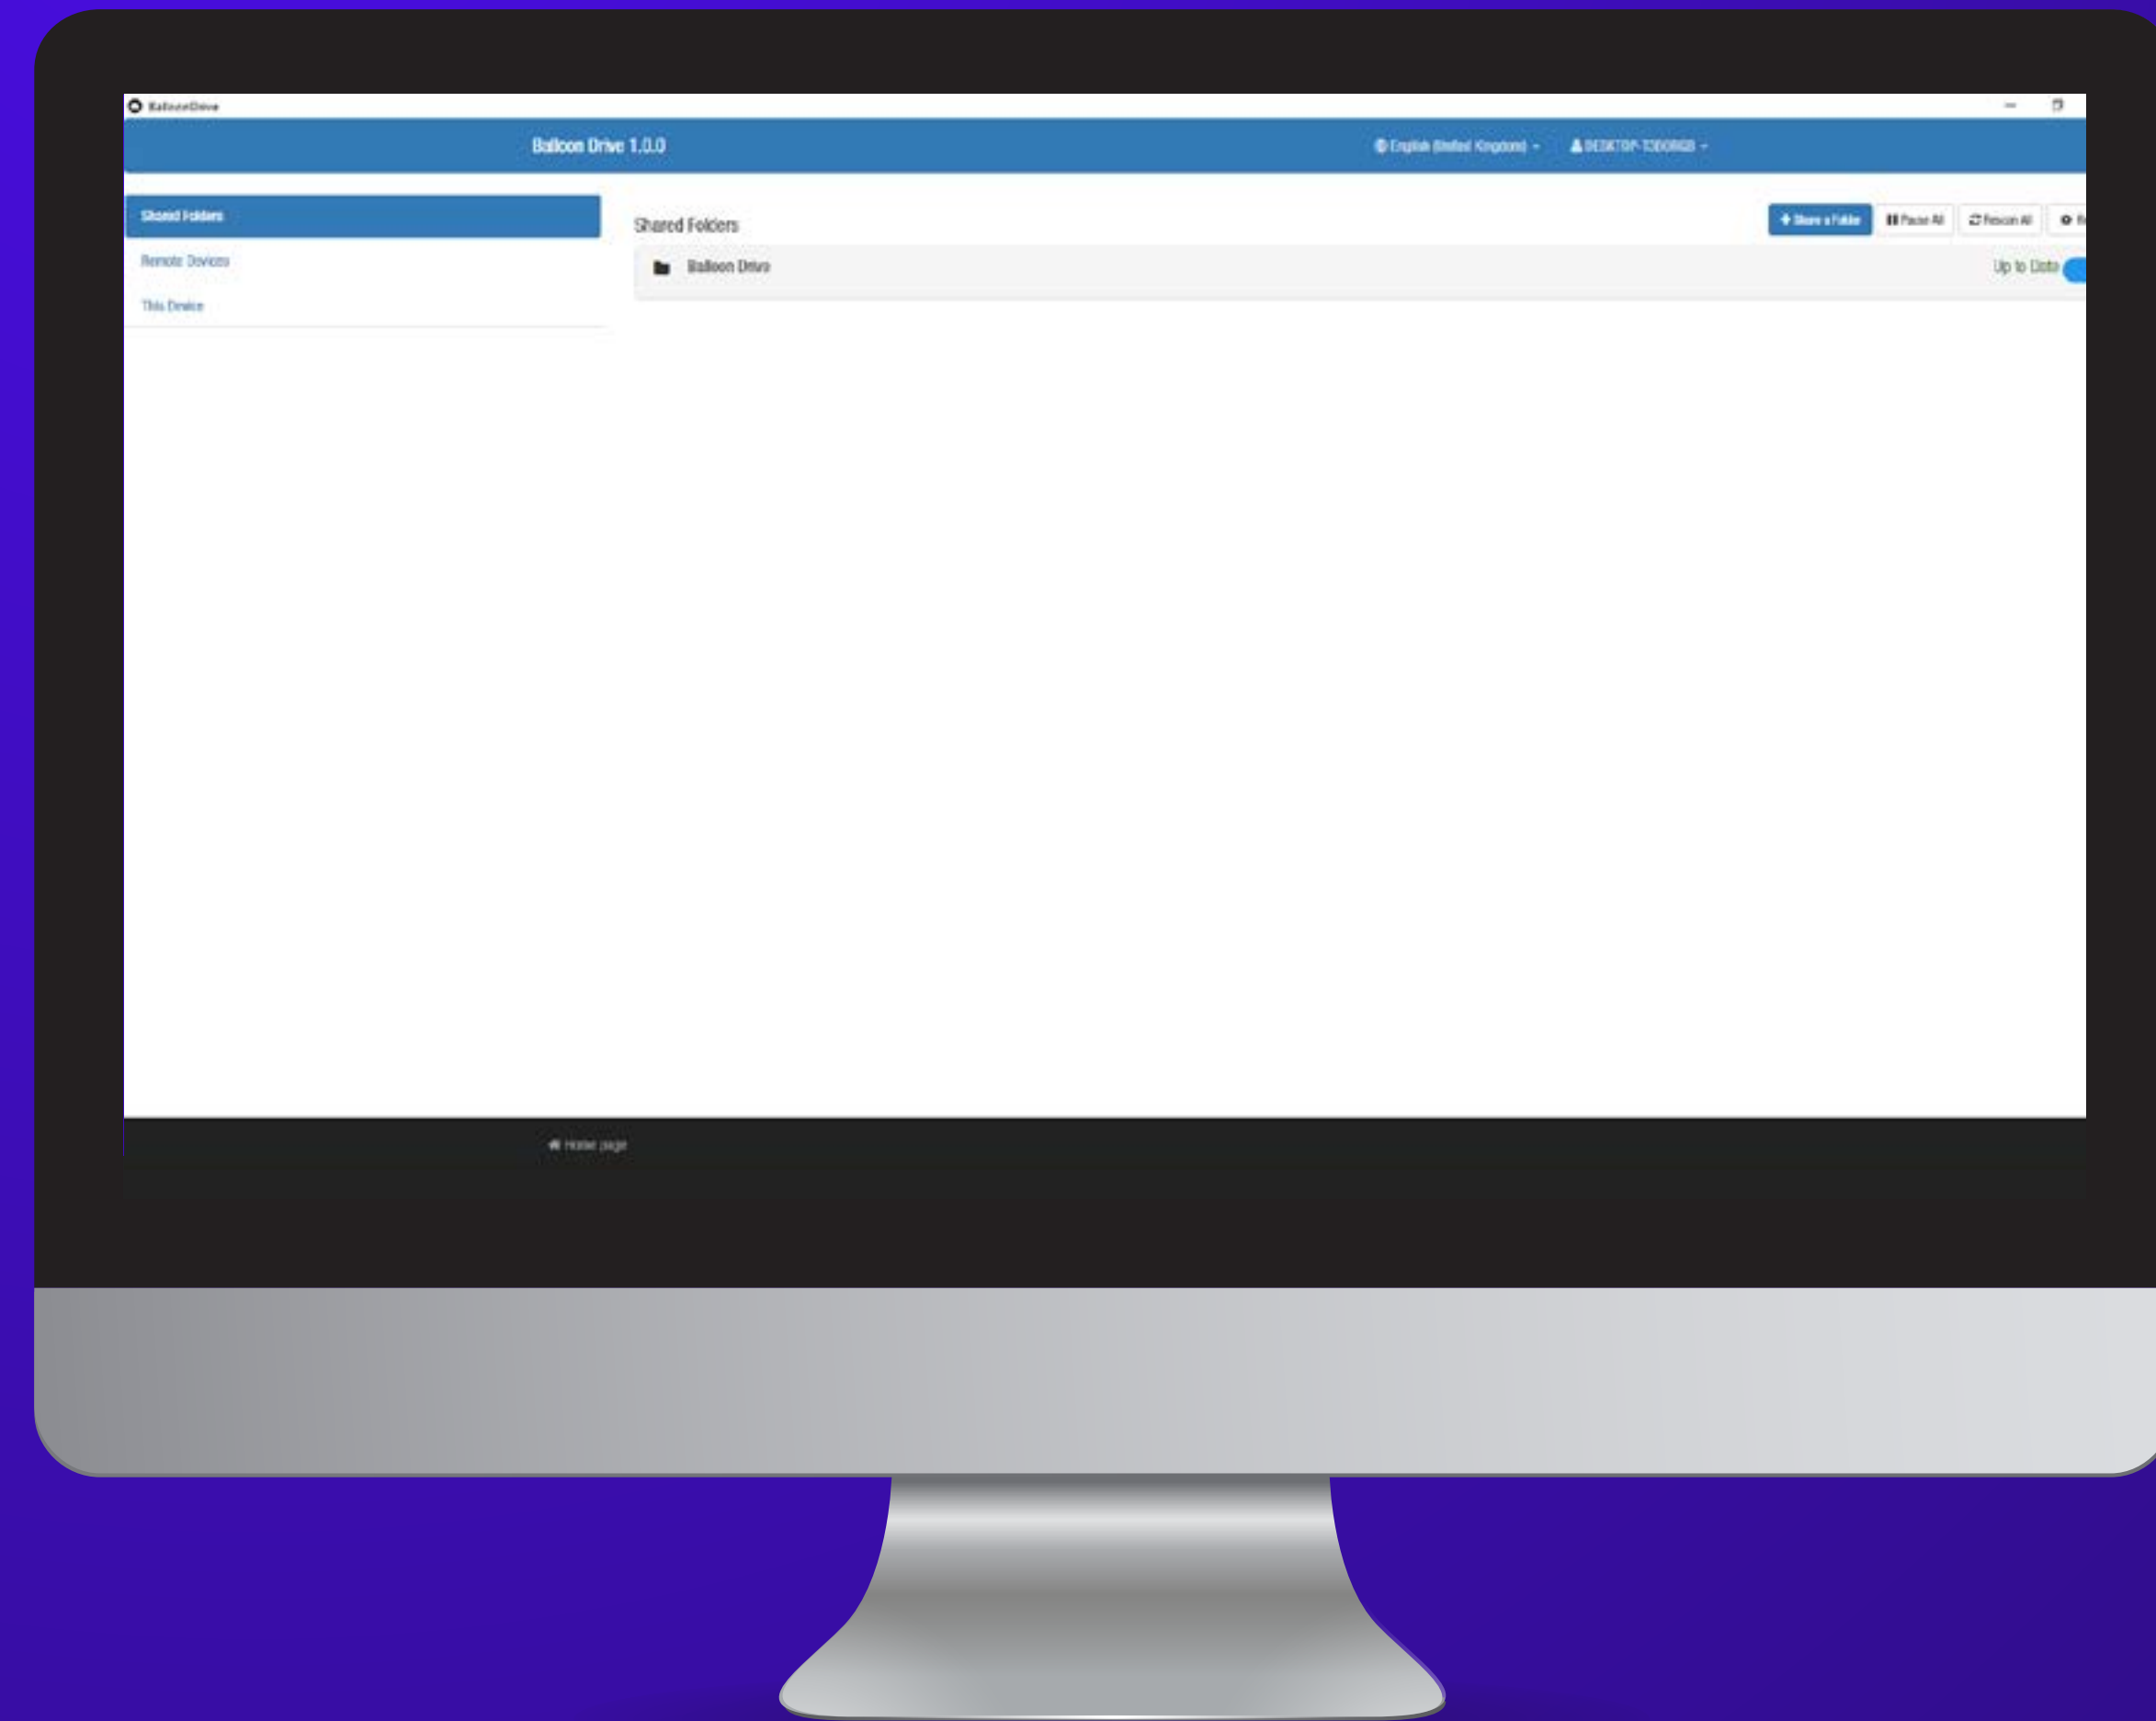

9

When it opens you must click in the window to log in.

Done! This device is already  
a part of your private cloud.  
Let's go to another device

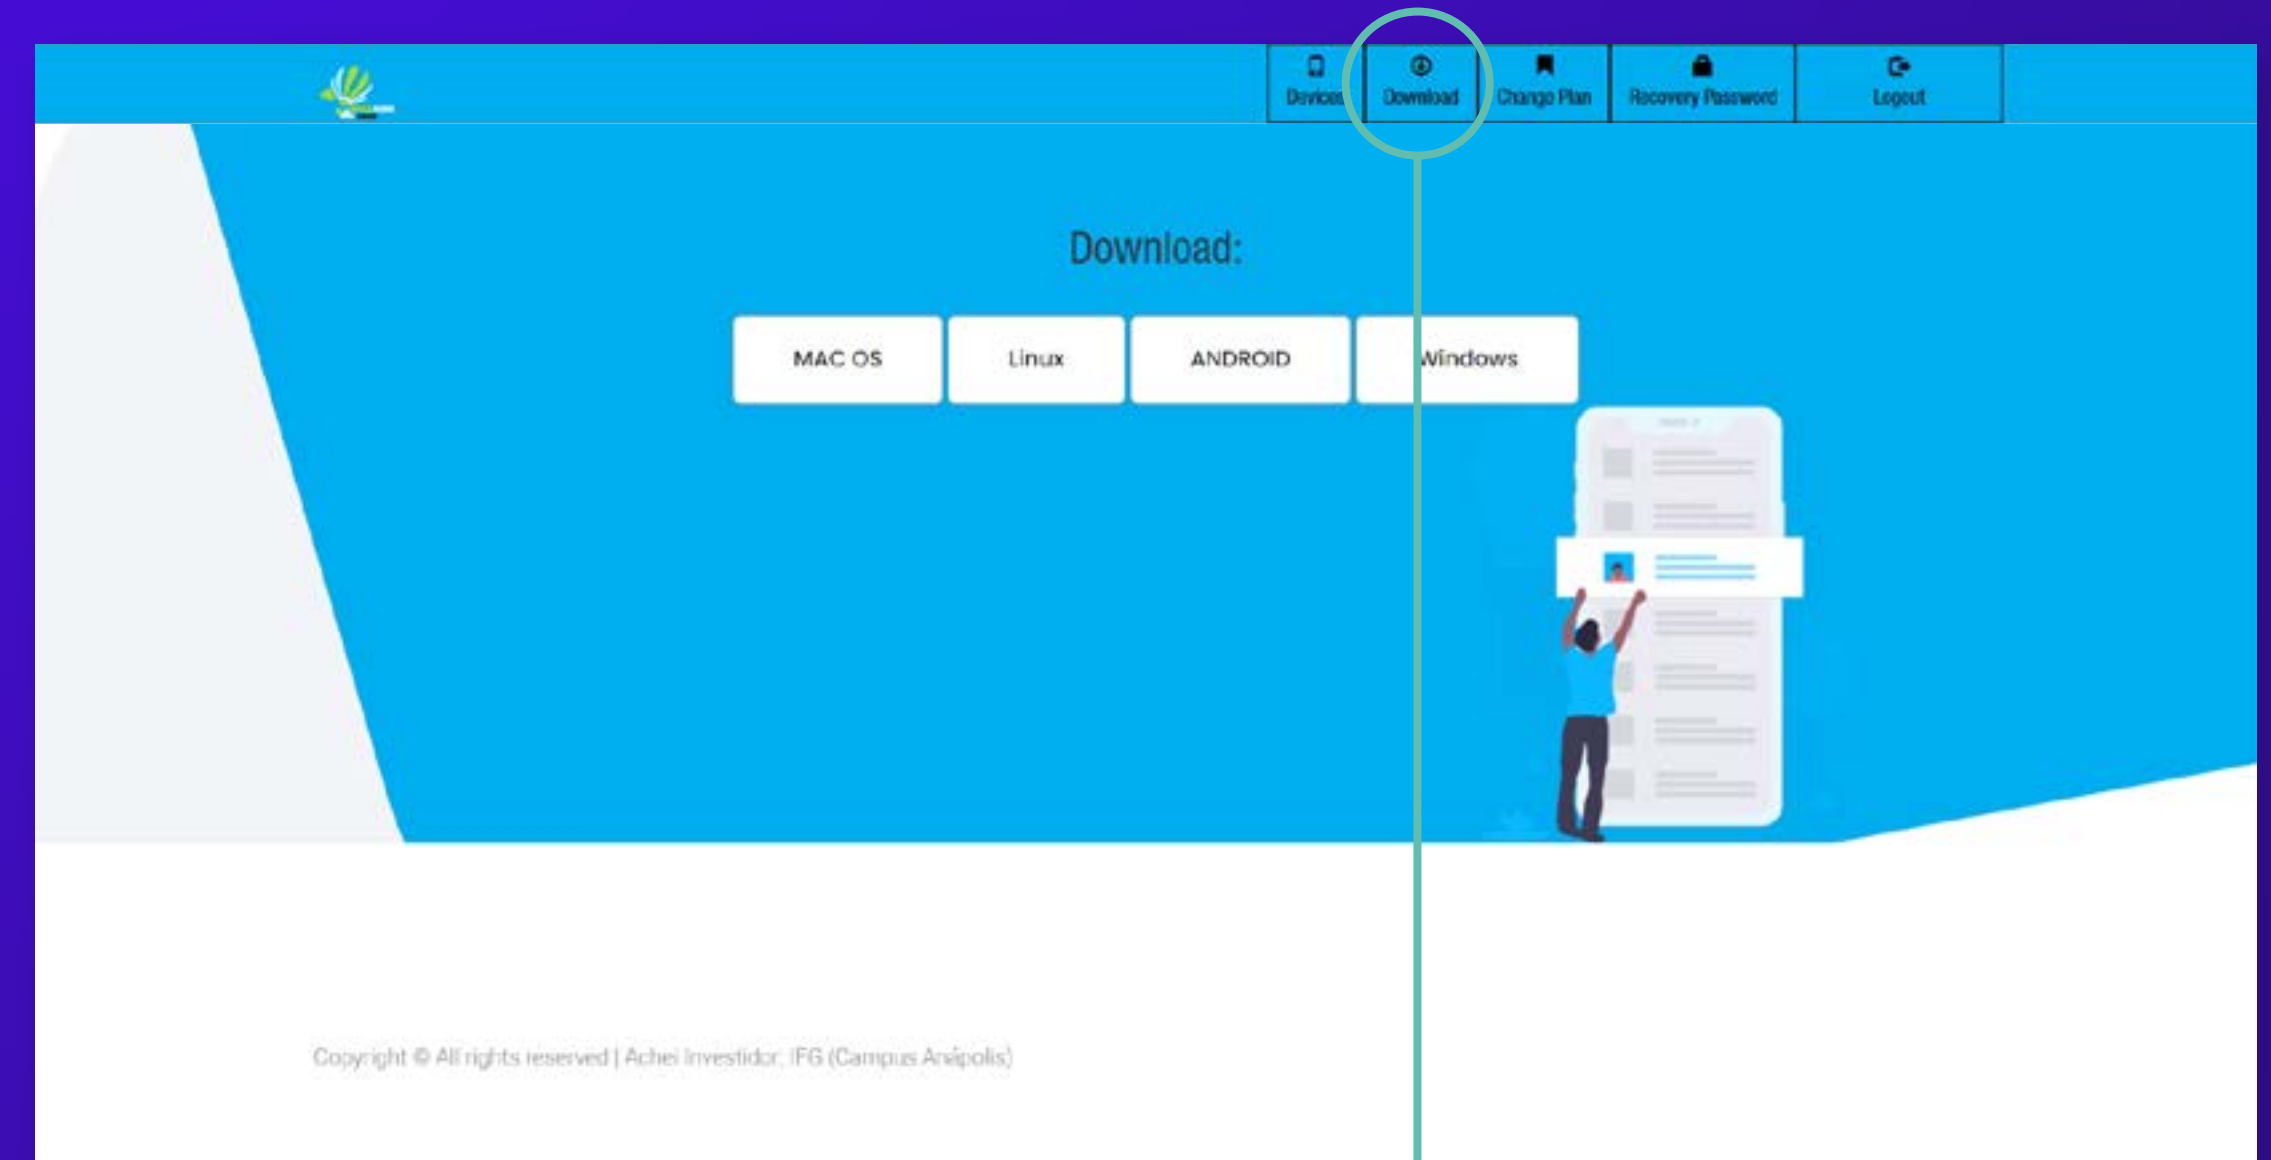

10

Access the Balloon Drive with another device.

*This time, click on enter using the same e-mail and password registered.*

[www.balloondrive.com](http://www.balloondrive.com)

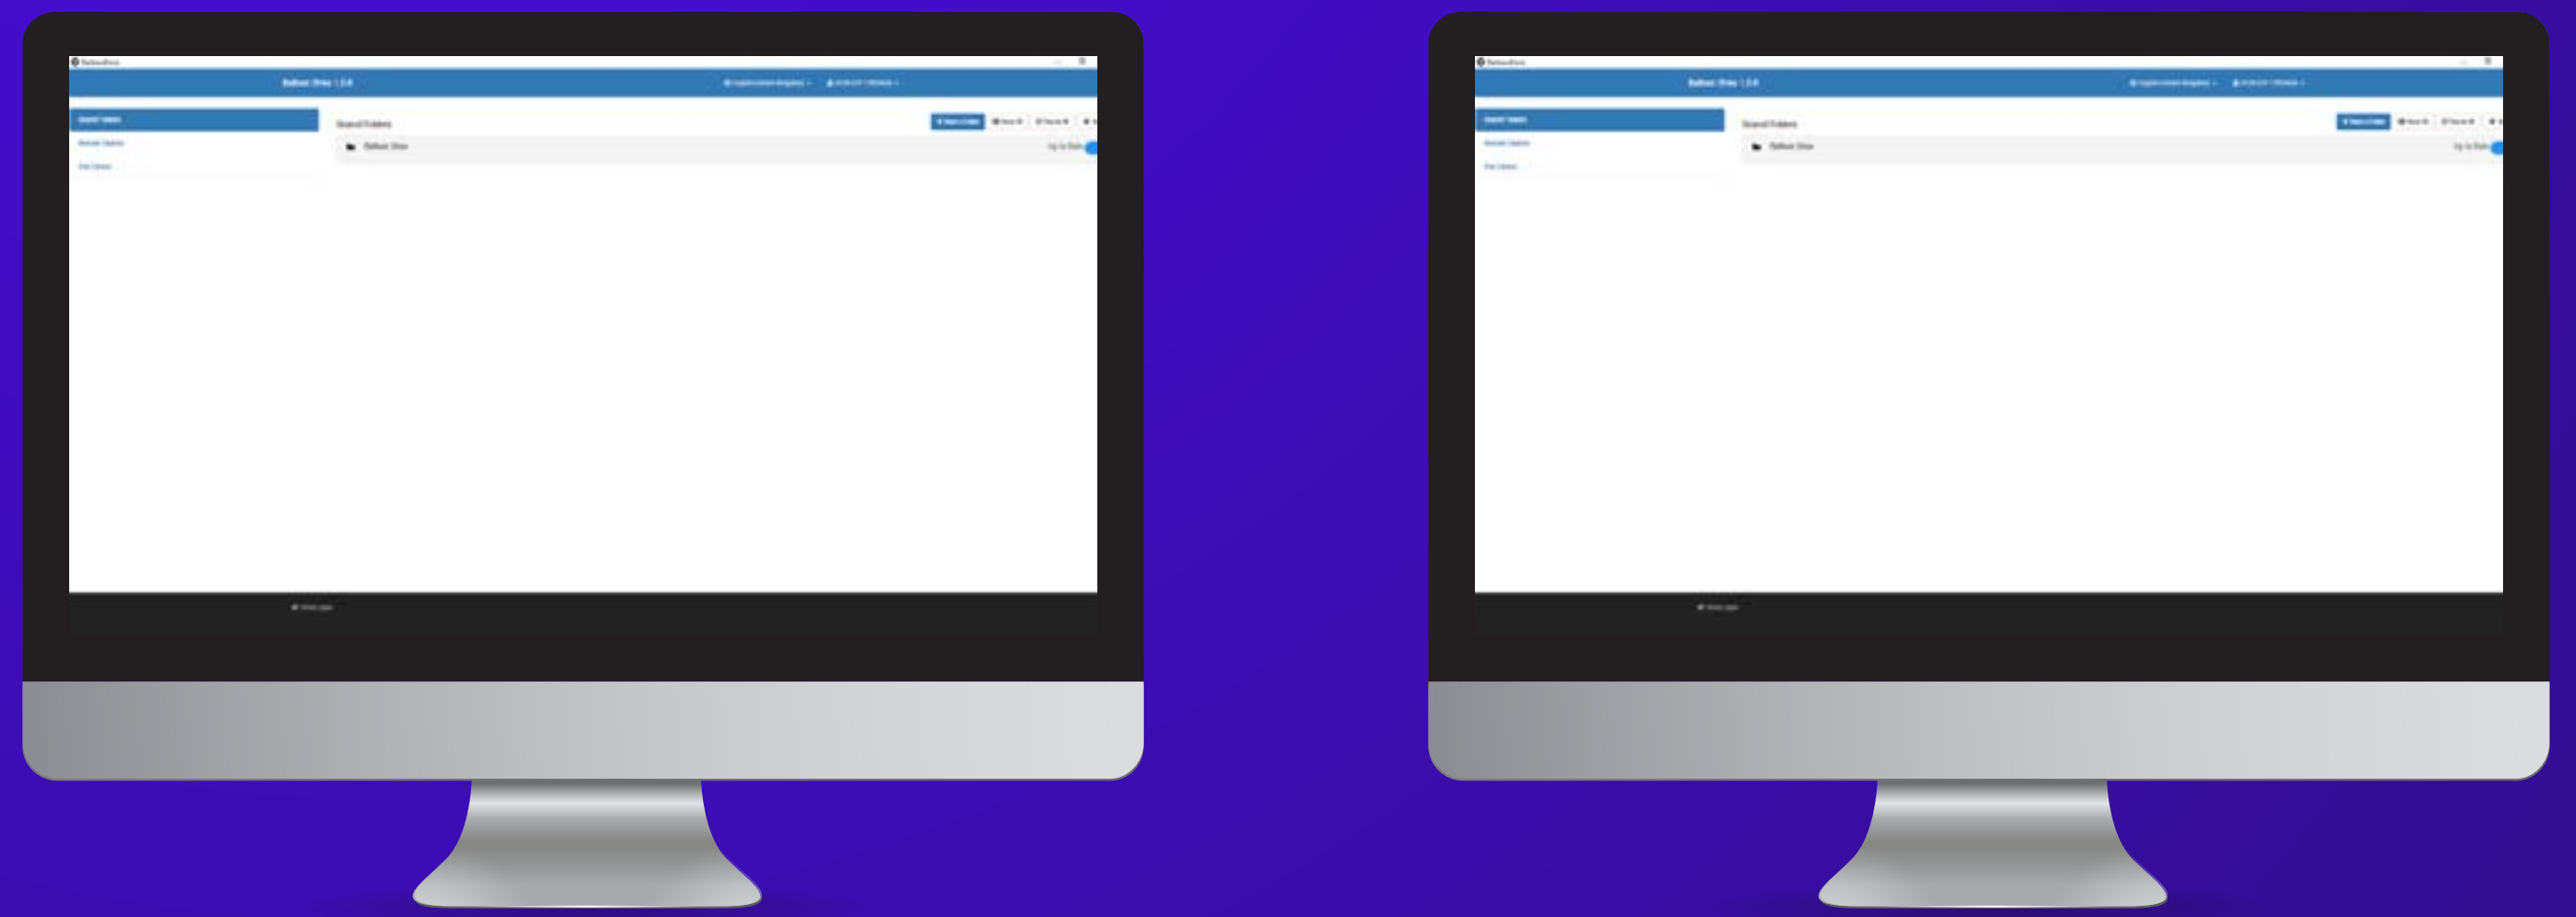

11

Repeat the installation process of Balloon Drive

Confirm clicking in yes and you have 2 devices in your private cloud.  
If your plan has more devices, just repeat the process in each other.

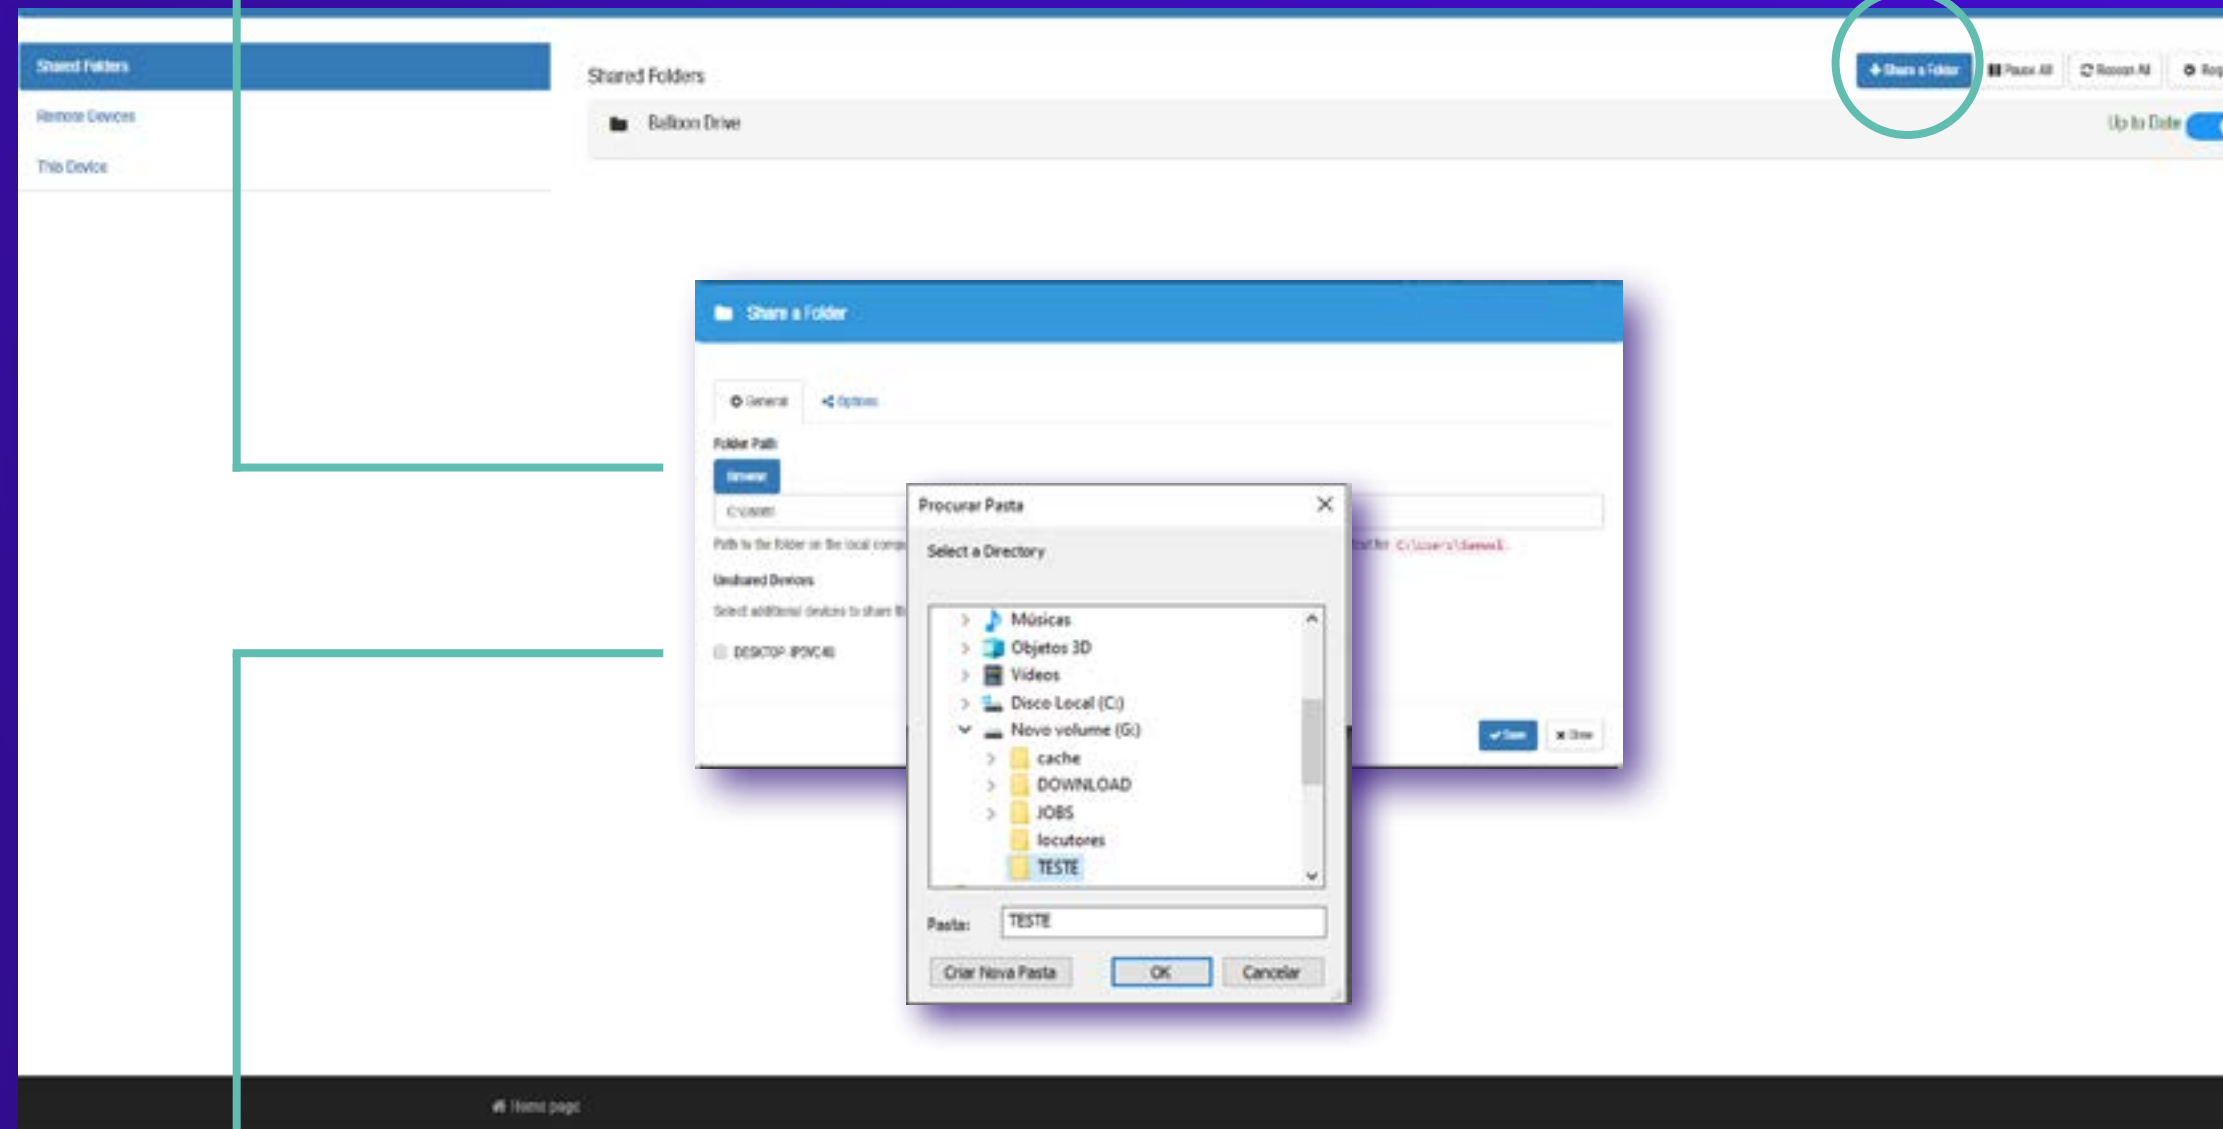

Now, I will show you how to custom a folder.

12

Click in  
" share a folder"

**A** In "Browse" rename the path to  
your custom folder

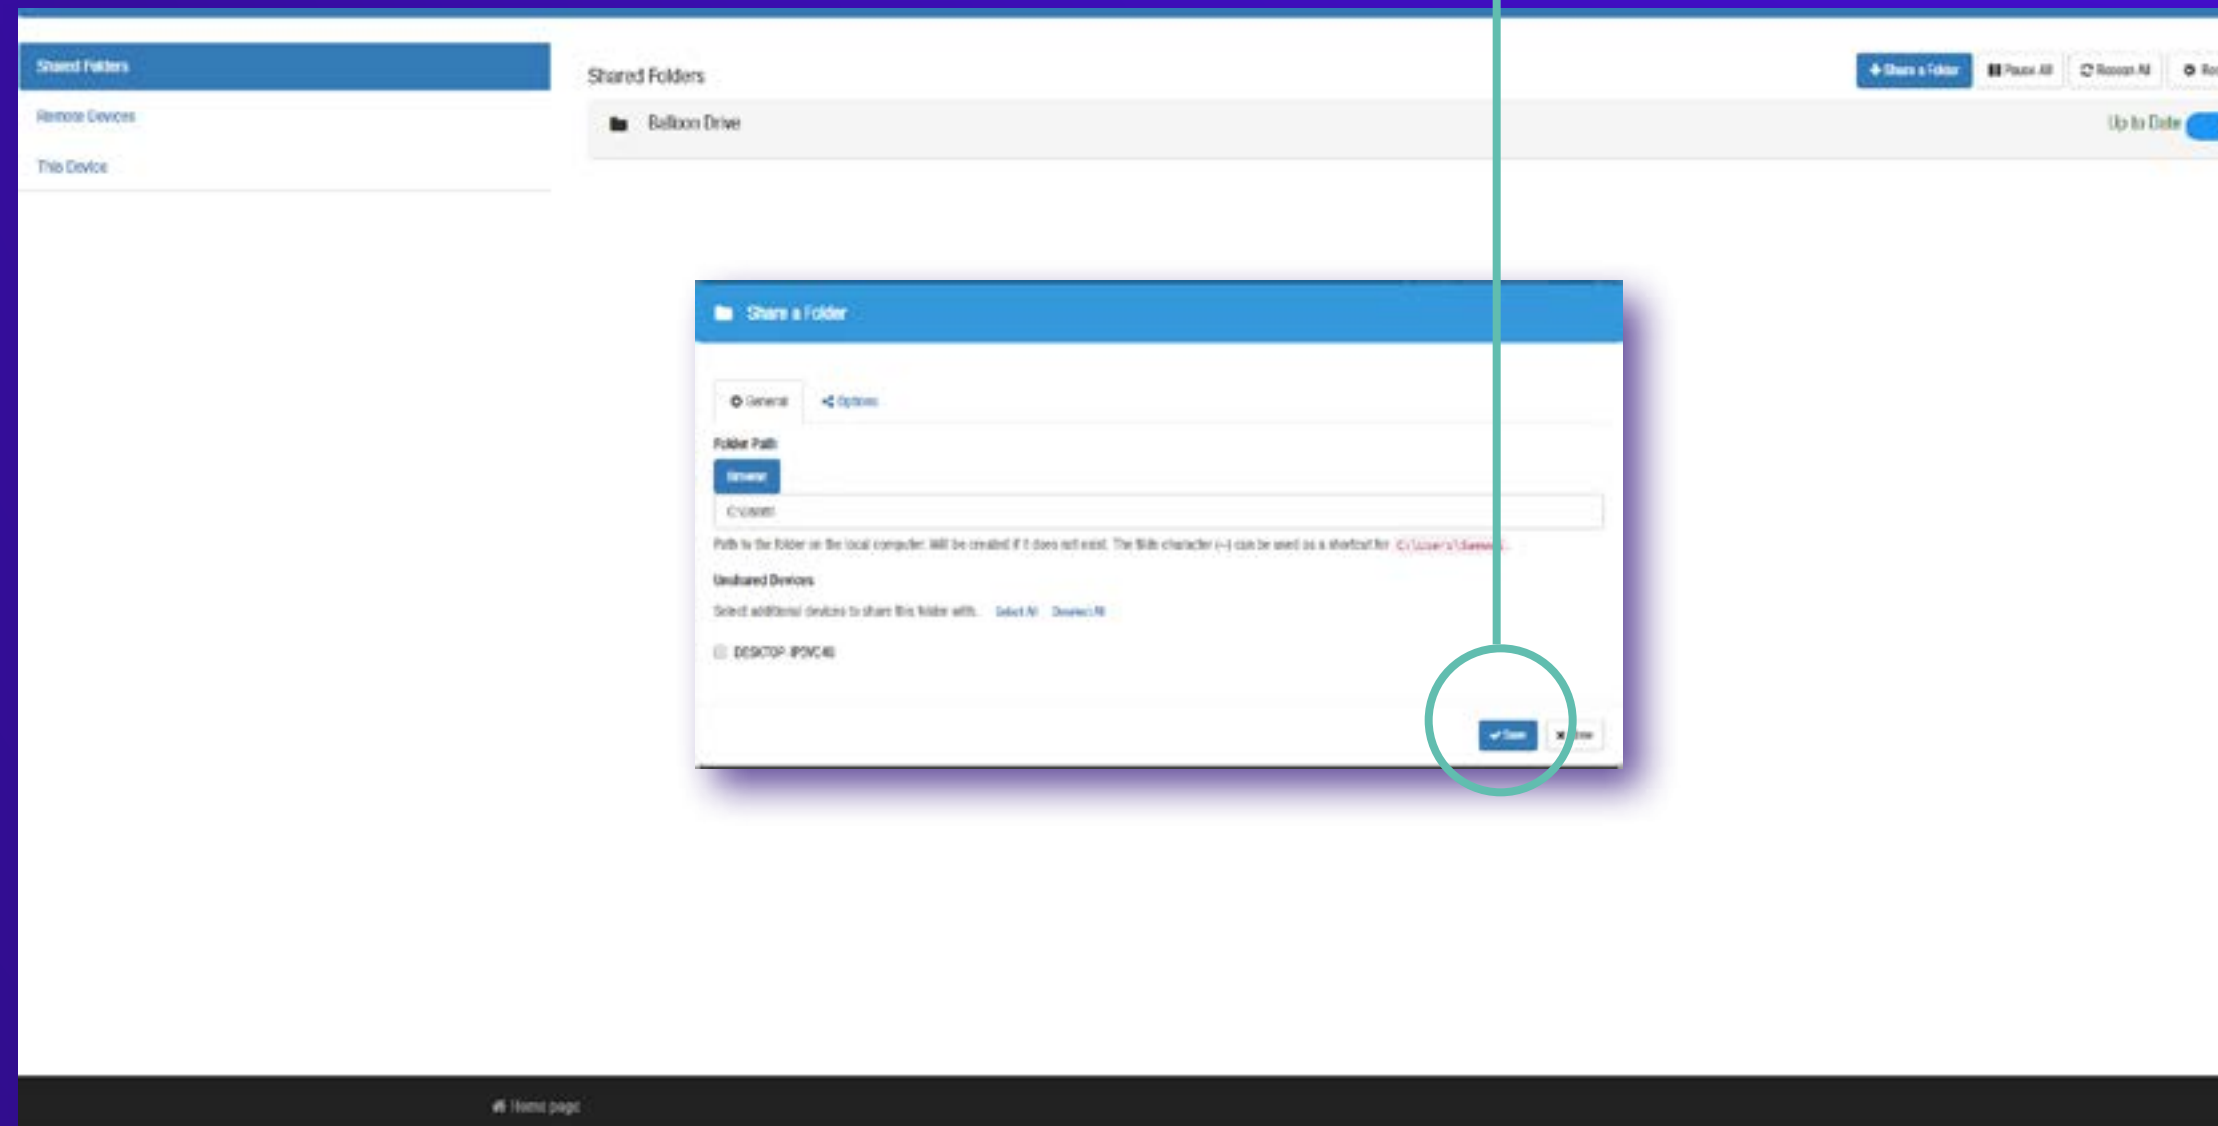

**B** select the device that goes to  
share that folder

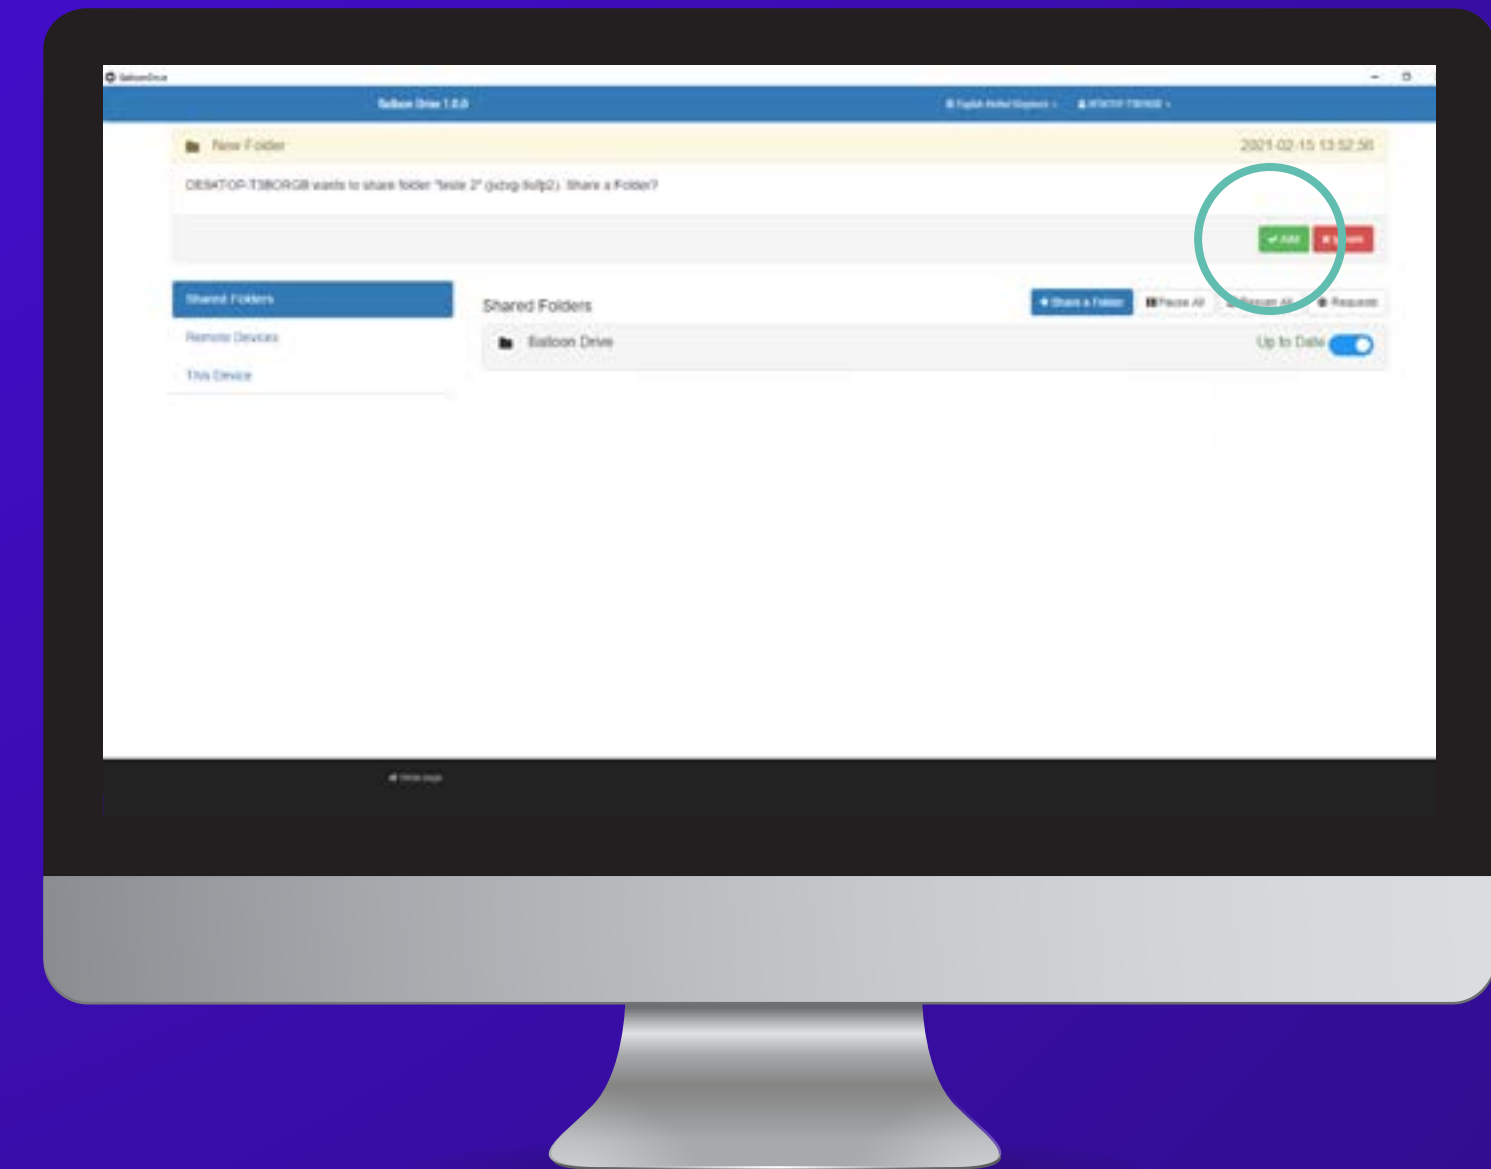

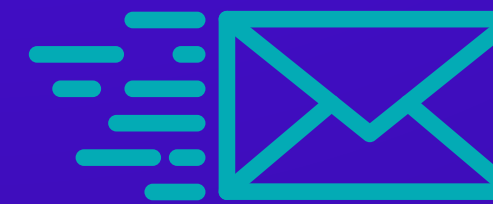

13

Done! click in save.

Done! the custom folder was created in the first device and an invite to sharing was send to the second device

14

Now, you only agree with the sharing in the second device.

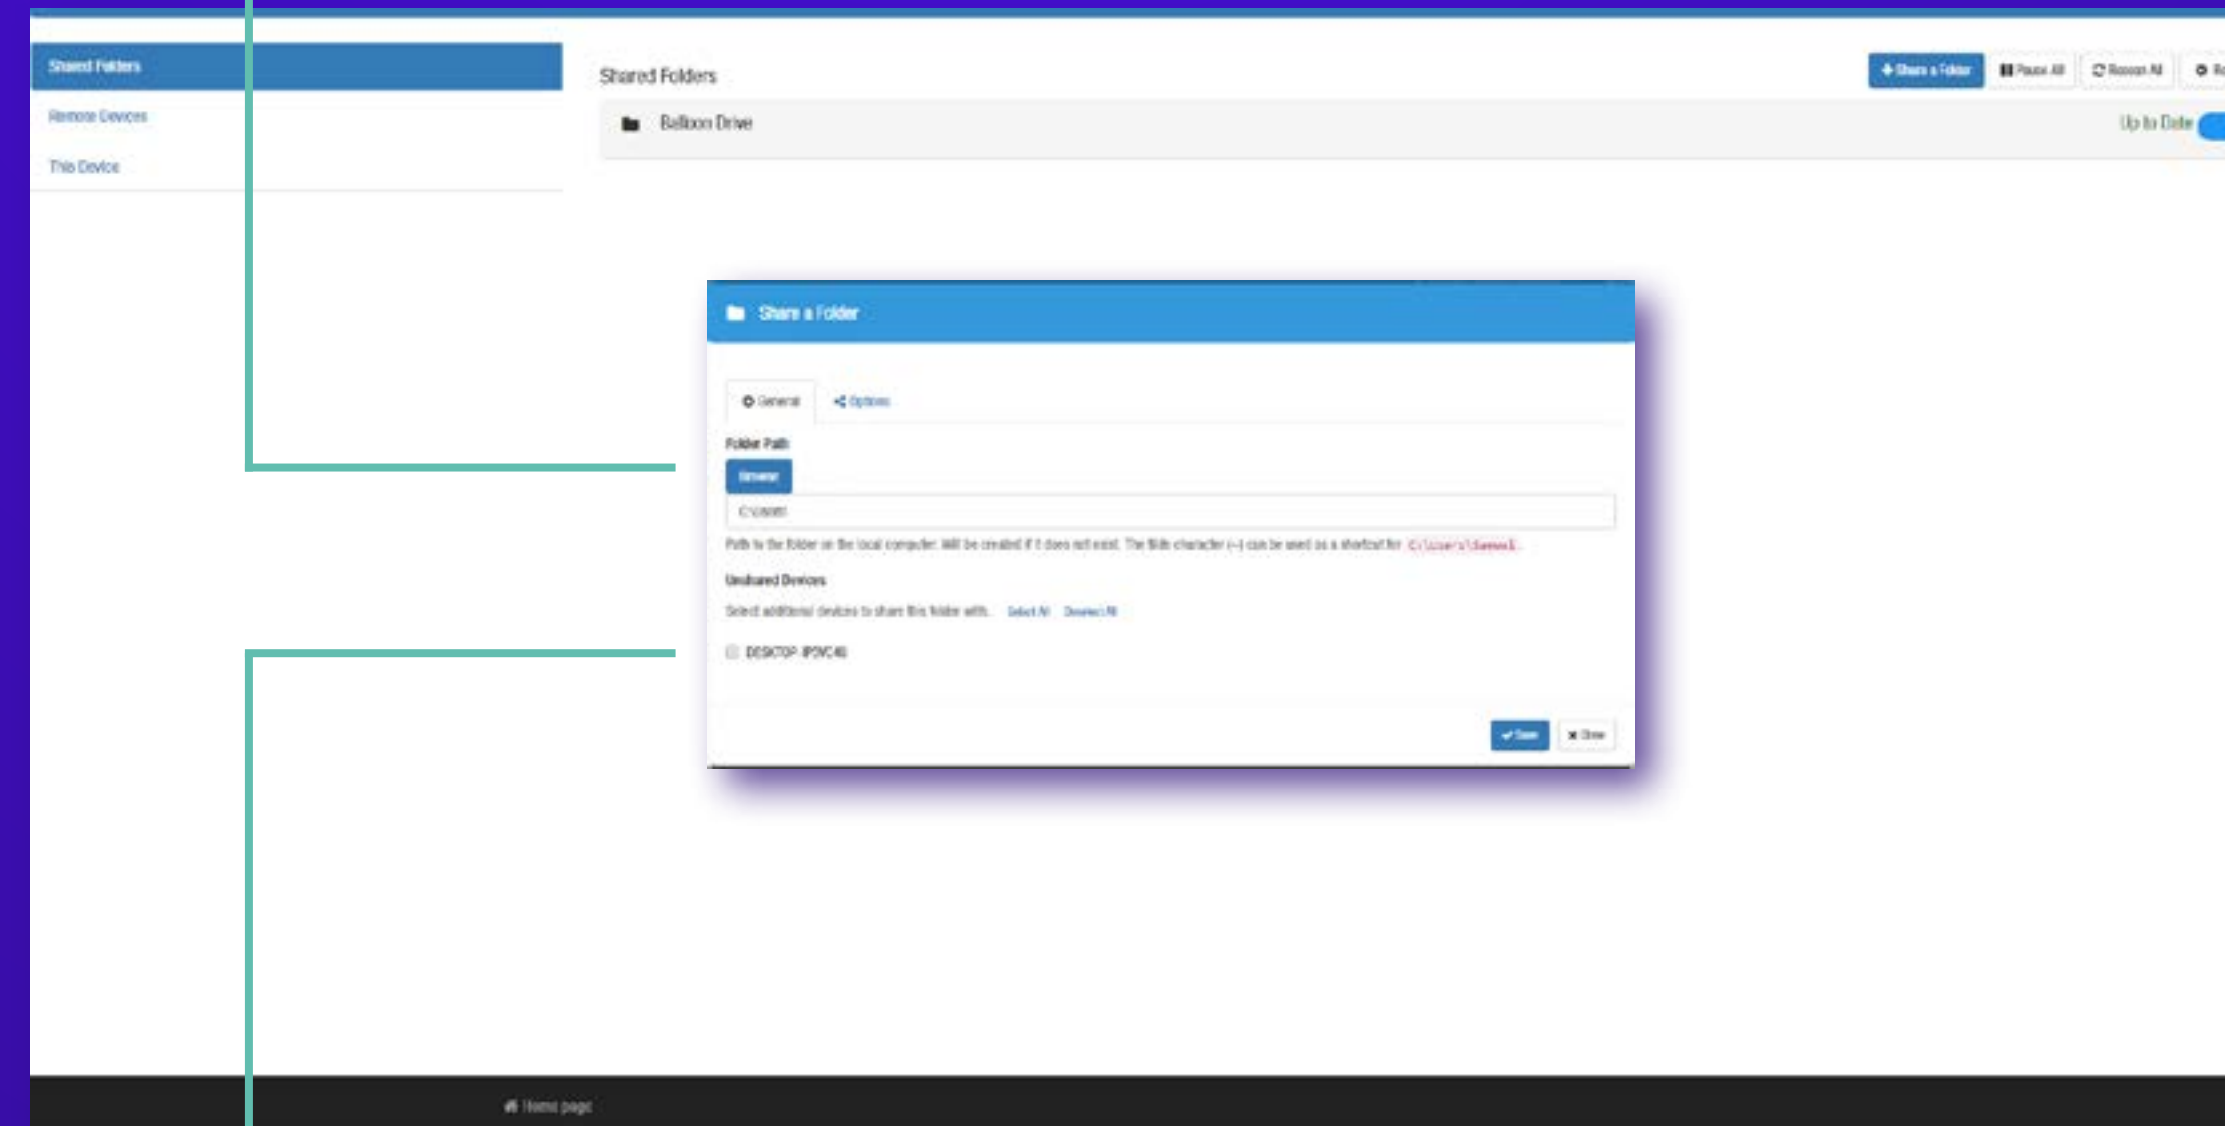

15

For to finish the selection, go again to "browser", rename a folder to be with the same name "If you wish"

A

"browser", rename a folder to be with the same name

B

Select who is part (smartphones, tablets, etc) of the cloud, and click in save.

Done! Now, you are part of ...

the first hybrid cloud  
of the planet.!
